The prices in the matrix below represent what our experience indicates will be the range into which our actual price quote will be. We expect our quote to be between the lower and higher figures in at least 80% of our quotes. However, due to wide variables in our consumables costs and the time required to process an order, we must see your actual art file and also know the size at which it will be printed as well as the quantity in the run to be able to give you a firm quote.

We print 100% color cotton fabric with many brands/colors, light and heavy weight cotton via this method. We do not print safety green or any neon color shirts when printing white ink via DTG. The pricing assumes that you are providing the shirts. To produce a good quality result, we need a good quality, decently high resolution Photoshop file on a transparent background, or a 100% vector art file in Illustrator. We have explained in depth our art requirements in a separate ART REQUIREMENTS document. Please read that prior to sending art. That document, and other information, is available on our website for viewing and downloading. It will not be unusual for our needed file to be large. If your file is too large to send to us as an email attachment, please use our FTP link which is shown on our website and in our emails.
