**SCREEN RETENTION AND COST** - The charge to make screens is \$15.00 ea., net. For orders of 72 or more pieces, there are no screen charges for reorders within one year. For orders of 72 pieces or less, screens are not retained and new screen charges will apply to reorders.

**PROCESS PRINTING** - We screenprint standard CMYK 4 color process onto white shirts and "simulated process" onto colored shirts. Simulated process is charged as a 9 color print job. For order quantities less than 288, consider our "direct to garment" digital process for 100% cotton items.

In addition, there is a charge of \$15.00 ea. to produce the film positives required for process.

**PRINT CHARGE** - Find the column that includes the quantity of shirts per design that are being printed in an order. Then go down the column to the row that contains the number of colors in the design. The price is shown where the row and column meet. Find the cost that way for each location being printed on the shirt. The printing charge for a job where the shirt is being printed on the left chest and full back, for example, is calculated by finding the price for the front print and also for the back print and then adding them together.
